

CSCE 330 Fall 2007

PROGRAM 2

Assigned Tuesday, 2007-10-23. Due Tuesday 2007-10-30

1. Load the C3 factorial program in Simplesem and run it. Single step to understand how it works.
2. Modify the program, so that it is now a $C4''$ program. To do so, you need to add static links. Note that the modified program should have the same effect as the original program.
