

**CSCE 330 Fall 2007**  
**QUIZ 16**  
Assigned Tuesday, 07-11-13

1. Composition and construction are examples of

- (a) primitive functions
- (b) control structures
- (c) combining forms

(Choose one)

**Answer:** combining forms (3)

2. Combining forms are also called higher-order functions, because

- (a) they are closer to the way programmers think than normal functions
- (b) they take other functions as arguments
- (c) their domains and ranges have high dimension

(Choose one)

**Answer:** they take other functions as arguments (2)
