CSCE 146 Spring 2001

QUIZ 2

Assigned Thursday, 01/1/25

An abstract data type (ADT) is a general purpose class based on a mathematical object. Which one of the following is an ADT?

1. The Throttle class
2. The Set of Integers.

Answer: The Set of Integers. (The Throttle class is not general-purpose and is not based on a mathematical object.)
