CSCE 330 Fall 2002

Quiz 17

Assigned Monday, 02/10/28

Choose one: In a dynamic array (as used in Algol 68 and Ada), the bounds of the array are known:

1. at language definition time
2. at program writing time
3. at compile time
4. at unit activation time
5. at the time the array is referenced in a statement.

Answer: At unit activation time.
