CSCE 330 Fall 2001

Program 2

Assigned Wednesday, 01/10/24. Due Wednesday, 01/10/31

1. ftp to cse.sc.edu and download the program fac.sim from directory pub/valtorta/simplesem/PROGS. Load that program into the simplesem interpreter and run it. Note that this is the C3 example in section 2.7.3 of the textbook. Make sure that you fully understand how it works.

2. Modify the program, so that it is now a $C4''$ program. To do so, you need to add static links. Note that the modified program should have the *same effect* as the original program.

3. Turn in the modified program using the departmental dropbox project2 at `https://www.cse.sc.edu`.
