CSCE 330 Fall 2003

QUIZ 14

Assigned Tuesday, 03-11-05

1. Composition and construction are examples of
   (a) primitive functions
   (b) control structures
   (c) functional forms

   (Choose one)

   Answer: functional forms

2. Functional forms are also called higher-order functions, because
   (a) they are closer to the way programmers think than normal functions
   (b) they take other functions as arguments
   (c) their domains and ranges have high dimension

   (Choose one.)

   Answer: They take functions as arguments.
